SUMMARY

Third-year Informatics student at Universitas Multimedia Nusantara (GPA 3.88/4.00) with practical experience in full-stack web development and software automation. Experienced in developing responsive web applications, backend systems, integrating databases and APIs, and automating workflows. Seeking a 5-6 month Full-Stack Development Internship starting January 2027.

EXPERIENCE

Automation Software Developer | UMNFestival 2026 | February 2026 - November 2026 Github

- Developed Ivy, a Python CLI automation tool using Playwright to streamline Instagram paid promotion verification process across multiple assigned accounts.
- Automated Story and Feed validation against configurable requirements, including hashtags, captions, account mentions, embedded story text, and link stickers.
- Implemented OCR text recognition with EasyOCR and OpenCV, combined with fuzzy matching to validate text in Story images, while retaining an operator-assisted review to confirm results and handle exceptions.
- Integrated Google Sheets and Google Docs to automate violation records, penalty tracking, payment records, and divisional report generation.
- Reduced manual verification time from 20-30 minutes to under 5 minutes per batch consisting of 20 accounts. Python, Playwright, OpenCV, EasyOCR, Google Sheets API, Google Docs API

PROJECTS

GamesVault | Handheld Gaming Console Showroom | June 2026 - Present Web | Github

- Co-founded an independent handheld gaming showroom business with a partner and developed its web platform for product presentation and management.
- Built and maintained the full-stack application using React.js and Node.js/Express.js, developing responsive frontend interfaces, RESTful APIs, and backend authentication.
- Integrated Firebase Firestore for product and administrative data management, implementing CRUD operations and JWT-based authentication. React.js, Javascript, Node.js, Express.js, Firebase Firestore, JWT, Three.js, Tailwind CSS

Jalur Langit | Medical Placement Discovery Platform | July 2026 Devpost | Github

- Co-developed a platform connecting undergraduate medical students in Indonesia with clinical clerkship and internship opportunities as part of a three-member team
- Contributed to frontend development using React.js, implementing responsive interfaces, job filtering, profile management, and automated application workflows.
- Collaborated on intelligent job-matching and application management features for the GarudaHacks 7.0 hackathon competition. React.js, JavaScript, Node.js, Express.js, Axios, Vite

COMPETITION

Garudahacks 7.0 | 2026 **|** Hackathon Participant
Google CTF (Capture The Flag) | 2025 **|** Participant

EDUCATION

Universitas Multimedia Nusantara | Tangerang Selatan, Indonesia **Aug 2024 - Aug 2028 (Expected)**
Bachelor of Informatics, GPA 3.88/4.00

TECHNICAL SKILLS

Programming Languages: Python, Javascript, Kotlin, C
Frontend: React.js, Next.js, HTML/CSS, Tailwind, Bootstrap
Backend: Node.js, Express.js, REST APIs, Axios, JWT
Database: Firebase Firestore, MySQL, MongoDB
Automation & Tools: Playwright, OpenCV, EasyOCR, Google Cloud API, Git, Github
Languages: Indonesian (Native), English (Intermediate)

CERTIFICATIONS

Huawei ICT Academy: Artificial Intelligence V4.0 Course, openGauss V1.0 Database Course
IBM SkillsBuild: Web Development, Cybersecurity
Dicoding Indonesia: SOLID Principles, Java Programming, Project Management
